	Mumbai University
	PERCENTAGE: 66.83%

PROJECTS

2024	E-Commerce Website
COMPLETED	HTML, SCSS, React, Stripe, Strapi
	<ul style="list-style-type: none">• An e-commerce platform built with HTML, SCSS, React, and JavaScript for a responsive and dynamic user experience. It integrates Stripe for secure payments and uses Strapi for backend content management, providing a smooth shopping and checkout process.
2024	Sign-in/Login System
COMPLETED	HTML, Tailwind CSS, MonogDB, React, Node, Express
	<ul style="list-style-type: none">• A secure and efficient sign-in/login system built using HTML, Tailwind CSS, React, Node.js, Express, and MongoDB. The system includes robust security features like JWT (JSON Web Token) authentication, password hashing for secure password storage, cookies for session management, and OTP (One-Time Password) verification for enhanced account protection. This ensures a seamless and secure user login experience, with a modern UI and reliable backend support.
2024	Library Management System
COMPLETED	HTML, Tailwind CSS, React, Node, Supabase
	<ul style="list-style-type: none">• A modern Library Management System developed using HTML, Tailwind CSS, React, and Supabase for managing book collections and user data. The system features ag-Grid for advanced table management, offering sorting, filtering, and pagination for book records. react-hook-form is used for efficient form handling, while Yup provides robust form validation. The interface is designed with shadcn/ui components for a sleek, responsive, and user-friendly experience, making it easy to manage and interact with library data.
2024	UNFIED PAYMENT GATWAY
WORKING	<ul style="list-style-type: none">• A solution that simplifies payment integration for developers by supporting multiple payment gateways, making it easy to implement secure and versatile payment options in applications.
